D. TITLE:

“ELECTRIC HOUSEHOLD APPLIANCE FOR STEAM COOKING”

L. ABSTRACT

An electric household appliance for steam cooking is disclosed, suitable in particular but not exclusively for preparing the so called scrambled eggs, comprising: a basement; a body formed by two separable components, whose lower component comprises the water tank and the resistor for its heating, while the upper component, comprising a spring valve for the steam passage, forms a bearing surface; a container for the food to be cooked, to be placed on the bearing surface; a closure lid with a food mixing device; and an arm, comprising a conduit which allows the diffusion of the steam in the food container and a turbine fan, activated by the steam, which allows the movement of the food mixing device. This appliance allows to steam the food in a quick and healthy way and it is simple, economic and easy to clean.
